

Councils Saving Thousands!

Fluent Technology deliver local information systems that streamline the handling of enquiries from the public, reduce the time spent on the production of statutory returns and deliver real-time collaboration on defining policy initiatives.

ORIGIN is making a real, measurable impact across Britain with our clients seeing tangible benefits. One client has just reported an **estimated £40,000 efficiency saving in the last 6 months** on the reduction in staff officer time taken to access information .

Another client has told us they have actively used ORIGIN to transform how they produce their JSNA report and are now estimating a **50% time saving over** previous years. ORIGIN is transforming local authority working practices and is paying for itself in the process.

We have worked with councils and understand that improving efficiencies and saving money is crucial. With ORIGIN we can help you to achieve shared services and transparency at the same time as saving you time, money and resources.

Key Benefits of Origin

- A central hub for all data and reports on the community
- Achieve transparency and open up information to the public and your partners
- Increased volume of 'self-service' for information requests by the public
- Integration with NESS means data is continually updated
- More timely publishing of data to the public
- Save time on reporting and analysis up to 50% time saving on JSNA
- Instantly provides correlation analysis of data to identify trends in community statistics , saving on the cost and time of analysts
- Allows for evidence based policy and decision making
